PROTECT & ENHANCE CUSTOMER PRODUCTS AND BRANDS

At ECC, we build our business around the customer with a singular focus - to protect, enhance and grow customer products and brands. We take our customer brands as seriously as we take our own because when customers succeed, we succeed.

EXPERTS IN WINDOW & DOOR COATINGS

As experts in durable, high-performing, sustainable coatings for interior and exterior aluminum, fiberglass, vinyl and composite materials, and with a combined 90+ years in business, we make it our business to be experts in your business. ECC coatings are used by the most trusted window and door manufacturers, small and large.

PATENTED, WITH A FOCUS ON TECHNOLOGY

With three patents and almost 25 percent of our workforce dedicated to technology and research and development, we constantly look for new ways to improve coatings, production and performance, while being mindful of the environment. Whether the job calls for solvent borne, waterborne or UV, we have a complete finishing solution to meet the most demanding product and process needs.

Patented Finishing Systems Formulated for **Durability** and **Performance** in the **Most Extreme Weather Environments**. Environmentally Compliant. Unlimited Customization.

AquaThane™

1K WATERBORNE URETHANE

ECC's **AquaThane™** delivers the ultimate in hardness, heat reflectivity, excellent weatherability and durability. This advanced, waterborne urethane is designed for use over composite substrates and provides a wide range of color flexibility.

- > One Component
- > Easy to Apply & Fast Dry
- > Low VOC & Odor. No HAPS
- > Custom Colors & Gloss
- > Meets AAMA 615

UltraV™

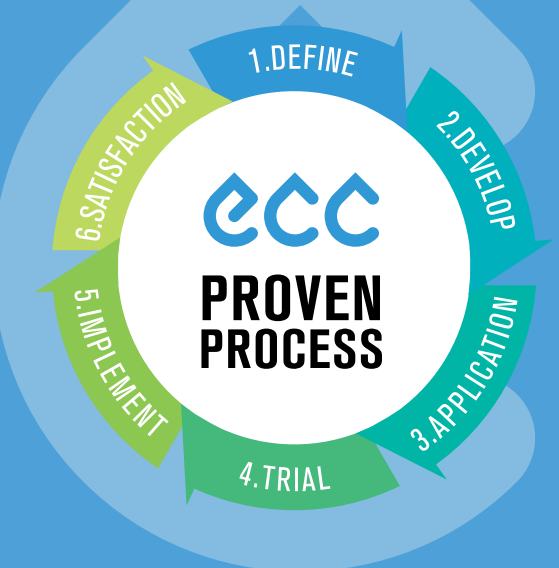

OPAQUE UV-CURABLE COATING

ECC's patented, exterior-grade **UltraV™** opaque, UV-curable coating is environmentally friendly and provides exceptional adhesion, light fastness, gloss retention, scratch resistance, weatherability, solar reflectance and low heat build. UltraV UV Cure Coatings are ideal for high-speed, automated production environments.

- > 100% Solids. Zero VOCs and HAPS
- > Instant Cure
- > Meets AAMA 615
- > Heat Reflective & Durable
- > Patented Technology

CUSTOM SOLUTIONS ARE WHAT WE DO BEST

Our proprietary, six-step ECC Proven Process ensures you get exactly what you want with a hassle-free, seamless transition.

ECC excels in creating advanced coating solutions that deliver measurable results. Whether the goal is process improvement, applied cost, improved product performance, or new products, we start by listening and learning, then define and develop a custom pathway that's right for the customer. Our ECC Proven Process guides the way and brings the customer's vision to life.
